Our Core Values

Relationships

We create respectful, mutually beneficial relationships with all we serve.

Integrity

We are fair, honest, and ethical in all we do.

Serve

Committed to the needs of others.

Excellence

Professionalism, continued improvement, and growth.

COURSE DESCRIPTIONS

HVAC System Component Evaluation Part 1 - Mechanical

The purpose of this course is to present various ways to evaluate mechanical system components and determine their overall operational condition. General safety considerations will be addressed along with a review of how the compression refrigeration cycle is applied to comfort cooling and heating. The course will then progress to how each individual system component operates under various conditions.

HVAC System Component Evaluation Part 2 - Electrical

The purpose of this course is to present various ways to evaluate electrical system components and determine their overall operational condition. General safety considerations will be addressed along with a review of how electrical energy is applied to and utilized by HVAC system components. The course will then progress to how electrical circuitry, components and controls operate under various conditions.

All CE hours are State approved for Ohio and Kentucky

Register at any branch for \$75.00 per class
